

DiamondPier®

FOUNDATION SYSTEM

NEW TO
AMERHART

Construction without Excavation

DiamondPier® is a structurally rated, code compliant, pre-engineered foundation system great for all types of secondary residential structures.

DiamondPier Pin Pile Technology combined with a high strength concrete head meets or exceeds ACI 318 standards.

The precast concrete head is installed at the ground surface, and steel bearing pins are driven through the head and into the ground using simple hand-held tools.
